Timur Samoilenko

Frontend Team Leader · Full-Stack Engineer · React / Node.js

Summary

Full-stack engineer and frontend team lead with 8+ years of experience building products in fintech. I work across the stack — from React and Next.js on the frontend to NestJS and Node.js on the backend — and lead teams focused on shipping quality software consistently.

Experience — 8 years 2 months

Alfa Partner

May 2022 – present · 4 years 6 months

Frontend Team Leader · June 2024 – present

Leading the frontend team at FintechIQ, responsible for goal-setting, process refinement, and quarterly performance delivery. Guide engineers through code reviews, technical decisions, and sprint planning while maintaining a high-output, collaborative team culture. Consistently improved team productivity metrics quarter-over-quarter since taking the role.

Web Developer · May 2022 – June 2024

Joined as a PHP backend developer and transitioned into a fullstack role after gaining proficiency in TypeScript. Developed and maintained the company's primary website across both backend and frontend. Led the independent end-to-end integration of a large, complex third-party API — architecting both server-side handling and the client-facing interface.

Expobank — Software Engineer

January 2021 – April 2022 · 1 year 3 months

Developed and maintained core backend services supporting communication between microservices. Built an asynchronous queue service using RabbitMQ to enable reliable data exchange across the platform. Developed a proxy microservice in Laravel to facilitate secure, efficient interaction with third-party APIs.

Vostochny Bank — Software Engineer

July 2018 – December 2020 · 2 years 5 months

Developed and maintained the bank's client document generation service, configuring print templates for accurate rendering across all client types. Built an internal tool for the department to track and manage form templates — including listing available forms, tracking variables, and deploying templates to test environments. Stack included PHP, Oracle, and Next.js.

Education

Pacific National University

Faculty of Automation and Information Technology, Informatics and Computer Engineering

Bachelor Degree · 2013 – 2017
